Viedoc Privacy Policy

Effective: Sep 29, 2019.

Changes since previous version  
The previous version of this policy had an effective date of May 27, 2018. Compared to that version we have updated the Partners paragraph to reflect new service providers used to deliver the Viedoc service. We have also made a minor update to the Study Participation paragraph (introduced a date).

I have read and accept the terms of use and the privacy policy

Logging in to Viedoc

# Logging in to Viedoc

Published by Viedoc System 2024-06-26

## 1. Logging in to Viedoc

### 1 Logging in to Viedoc

To log into Viedoc:

- 1 Go to the Viedoc login page:

- 2 Enter your primary email address and your password.

**Note!** After three failed attempts to enter a correct password, your account will be locked. To unlock it, you need to change your password. To do so, select the link to recover your password, see [Recover your password](#).

- 3 Optionally, select your language from the dropdown list.

**Note!** This language setting applies only to this login page. For instructions on how to change the language after login, see [User settings](#).

- 4 Select **Log In** to access Viedoc. If you are using two-factor authentication (see [Security settings](#)), you will be prompted to enter a security code before you are given access to Viedoc.

- 5 The **Two-factor authentication** page opens and you will be required to enter the authentication code you received via email or text message, according to your settings in [Security settings](#):

viedoc

English

## Two-factor authentication

Dear Viedoc user, your user account settings indicate that two-factor authentication is required to access Viedoc. Two-factor authentication strengthens your login security by requesting not only your password but also a second factor to verify your identity.

### Authentication code

To access the system, you must authenticate yourself by entering the 6-digit authentication code that was sent to your Email address:  
docto\*\*\*\*\*oc.com.

 This is a frequently used device that can be considered as safe and trusted. Don't ask me for a code for the next 30 days.

Submit

Didn't receive a code? Try these alternatives:  
[Resend code to +4\\*\\*\\*\\*\\*678](#)  
[Resend code to docto\\*\\*\\*\\*\\*oc.com](#)

© Viedoc Technologies AB 2023  
Viedoc version 4.73.0.0  
2023-07-06 11:11:44 UTC

**Note!** After three failed attempts to enter the correct code the user account will be locked.

- 6 In case you did not receive an authentication code or you want the code to be sent using the other method than the one set up in Security settings (for example, if it is set to text message and you want to get the code by email), you can select the link next to **Didn't receive a code?** at the bottom of the page. A new dialog box opens where you can select how you want the new authentication code to be sent.

**Note!** A new authentication code can be requested up to 5 times and is reset to 5 requests after a successful user login.

viedoc

English

## Two-factor authentication

Dear Viedoc user, your user account settings indicate that two-factor authentication is required to access Viedoc. Two-factor authentication strengthens your login security by requesting not only your password but also a second factor to verify your identity.

### Request a new authentication code

I would like to have the code sent to my email address

2023-10-30 14:10:20Z

- 7 Optionally, you can select **Trust this device for 30 days**. If selected, you won't be asked again for the authentication code for the next 30 days when logging in with the same username from the same device using the same browser (unless the browser session is in private mode or the cookies are cleared). The list of trusted devices is shown in the **Security settings**. After a password recovery, all the trusted devices are removed.
- 8 If the Privacy policy or Terms of use changed since the latest login, you will be prompted to read and accept the new terms.
- 9 In case you have been invited to a new study since your latest login, the Pending invitations dialog box is displayed prompting you to accept or reject the invitation to the respective study. See [Pending invitations](#) for more details.

Password management

# Password management

Published by Viedoc System 2024-03-13

## [1. Password management](#)

[1.1 Resetting your password](#)

[1.2 Changing your password](#)

## 1 Password management

### 1.1 Resetting your password

To reset your password:

- 1 On the login page, next to Forgot your password?, select **Click here**. The following dialog is displayed:

The screenshot shows a web interface for password management. At the top left is the 'viedoc' logo. At the top right is a language selector set to 'English'. The main content area is split into two columns. The left column contains the heading 'Let's renew your password.' The right column contains the heading 'Forgot your password?' followed by the instruction 'Enter your email address to reset your password.' Below this is a text input field labeled 'Your email address' containing the text 'DoctorDemo@viedoc.com'. A blue 'Submit' button is positioned below the input field. At the bottom right of the dialog, there is a small copyright notice: '© Viedoc Technologies AB 2023, Viedoc version 4.73.0.0, 2023-03-01 12:54:37Z'.

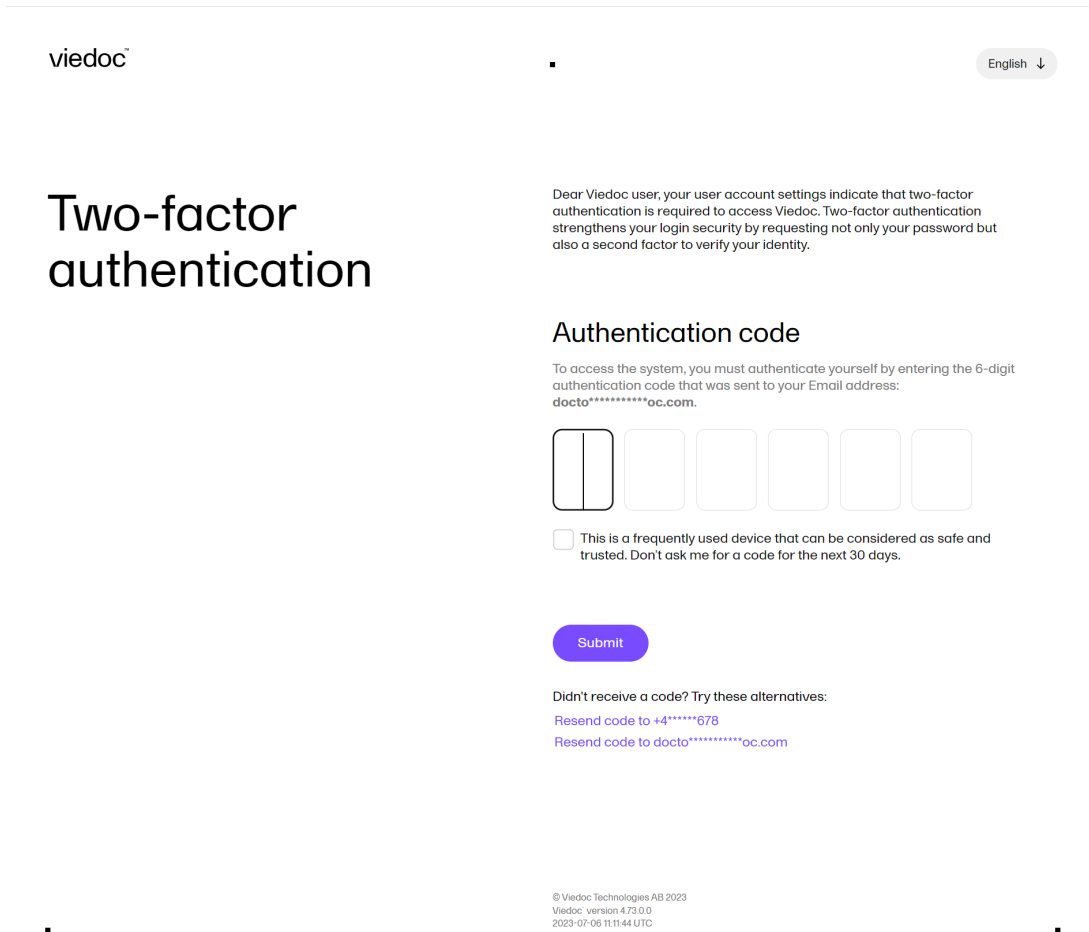

- 2 Enter your email address and select **Submit**. The system sends you a password recovery email and a Password retrieval request confirmation message is shown:

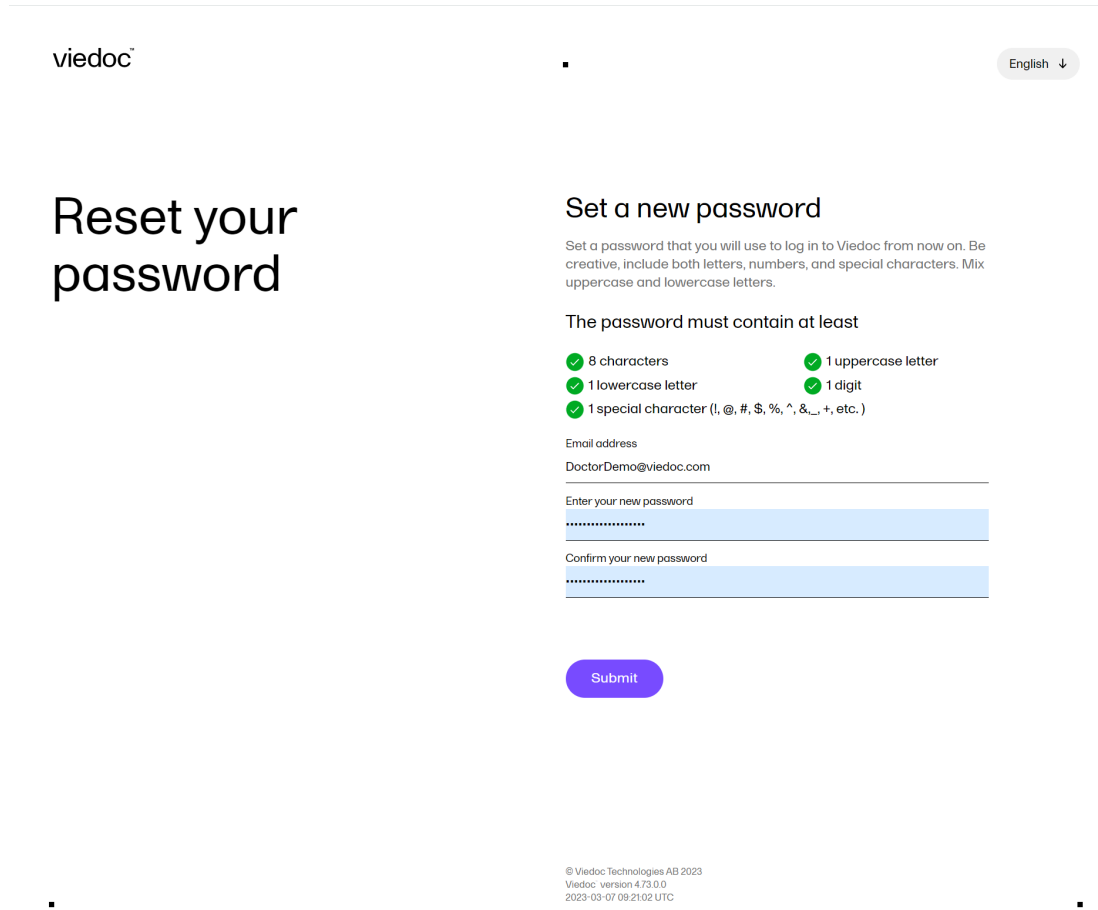

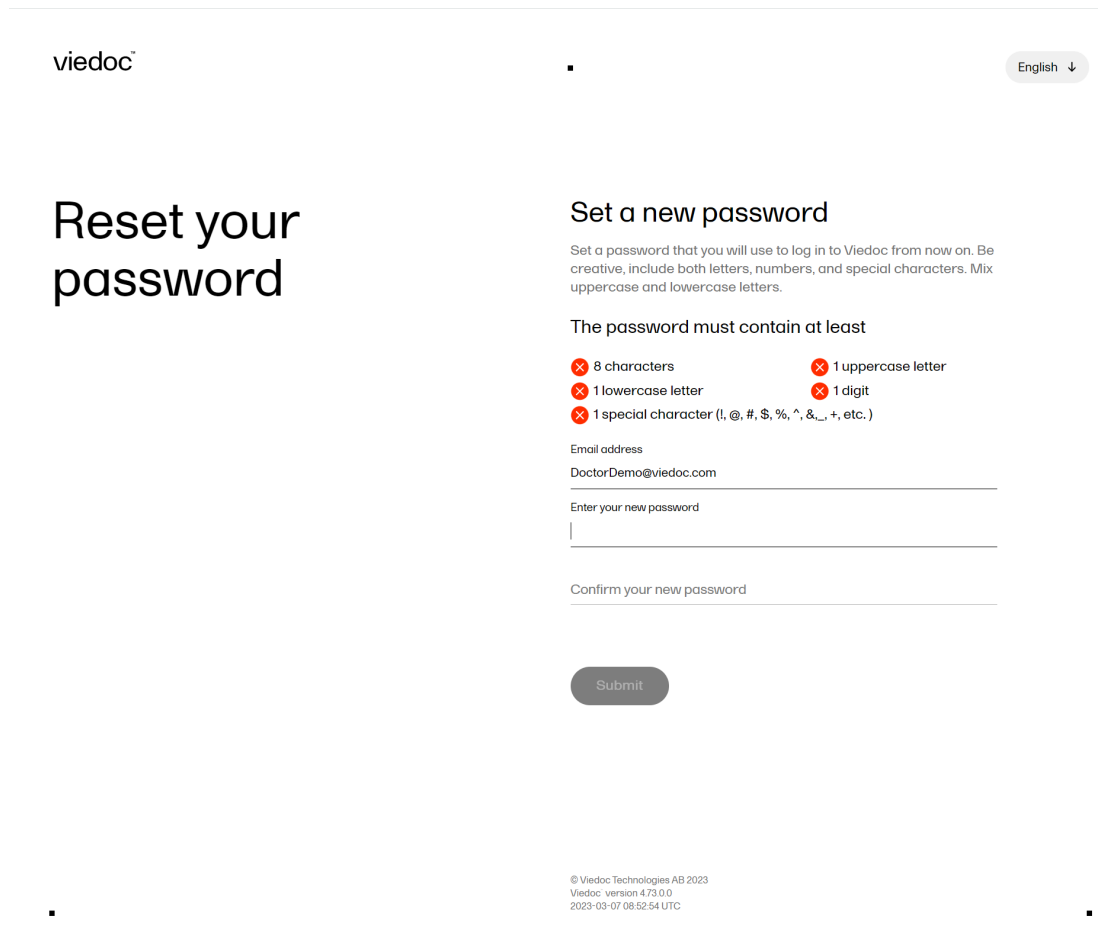

- 3 Select the link in the password recovery email. This directs you to the **Reset your password** page.

**Note!** You will first be prompted to enter a security code before you can access Viedoc:

The authentication code is sent to the phone number you set to receive text messages or to your secondary email address. If neither of these options are selected, you will need to contact your Study Manager to receive a link to reset your password. For more information on setting your phone number and secondary email address, see [User settings](#).

To reset your password, you need to fill in the fields **Enter your new password** and **Confirm your new password**, and then select **Submit**:

**Note!**

- For security reasons, the password recovery email is only valid for 3 hours. If 3 hours have passed and you haven't reset your password, you have to apply for a new recovery password email, by repeating steps 1 and 2 above.
- You can send up to three password recovery requests within a 24-hour time frame.

## 1.2 Changing your password

To change your password once you are logged in to Viedoc:

- 1 Select the settings button (wheel) in the top right corner of the landing page, and select **Change password**. The **Change password** window opens:

The screenshot shows the 'Change Password' interface in the Viedoc application. On the left is a sidebar with navigation options: 'User Settings', 'Change Password' (highlighted), 'Security Settings', and 'Authentication Log'. Below these is a link for 'viedoc learning'. The main content area is titled 'Change Password' and includes the following elements:

- User name:** A text field containing 'doctordemo@viedoc.com'.
- Current password:** A text field with the instruction 'Please provide your current password to change password.'
- New password:** A text field with a password strength indicator to its right. The indicator lists requirements: 8 characters, 1 lowercase letter, 1 digit, and 1 special character (including !, @, #, \$, %, ^, &, \_ , +, etc.).
- Confirm new password:** A text field for re-entering the new password.
- Buttons:** 'Cancel' and 'Save changes' buttons at the bottom.
- Footer:** Copyright information: © Viedoc Technologies AB 2023 · Terms of use · Privacy policy. Viedoc™ version 4.77.8677.14923 · 2023-10-05 13:10:12 UTC.

- 2 Enter the **Current password**.
- 3 Enter the new password in the **New password** and **Confirm new password** fields. The indicators to the right inform you when you have fulfilled all requirements for a strong password. The new password must be different from the previous 10 passwords you have used. If this requirement is not fulfilled, a message will notify you.
- 4 Select **Save changes**.  
**Note!** After entering an incorrect current password three times in a row, your account will be locked.

The process is similar for the case when your password expires and you are required to change it.

User settings

# User settings

## 1. User settings

- [1.1 Adding a secondary email address](#)
- [1.2 Verifying a secondary email address](#)
- [1.3 Changing the primary email address](#)
- [1.4 Editing your phone number](#)
- [1.5 Verifying your phone number](#)

## 1 User settings

Once logged in, you can edit your profile.

To view or edit your user settings, select the settings button (wheel) in the top right corner of the landing page, and select **Edit your profile**. The **User Settings** page opens, where you can configure the following:

- 1. User name** - this is your primary email address used for your Viedoc account. This is the user name you use to log in to Viedoc. See below information on primary email address.
- 2. First name and Last name** - fill in these fields that will be used to compose the **Display name** which will be used in Viedoc to identify your user.
- 3. System language** - select the language of your choice from the drop-down menu.
- 4. Primary email address** - this is the same as the **User name** described above. It is the email address used in Viedoc to log in, as well as for Viedoc user account-related operations (account setup, password recovery, study invitations). By default, this is set to the email address used to initiate the Viedoc user account. The primary email address must be unique and is mandatory. Therefore, it is not possible to delete the primary email address.  
See [Changing the primary email address](#).
- 5, 6, 7, 8. Secondary email addresses** - you can add up to 3 additional email addresses that will be used by Viedoc to send notifications on alerts and trackers as configured in Viedoc Designer. Viedoc alert emails will be sent to all the primary and verified secondary email addresses set up for your account.  
See [Adding a secondary email address](#) and [Verifying a secondary email address](#).
- 9, 10, 11. Phone number** - enter your phone number in format +[CountryCodePhoneNumber] (for example +46123456789) and if you want to receive text messages, select **This phone can receive text messages**.  
See [Editing your phone number](#) and [Verifying your phone number](#).

### Important!

- You must either select one of the options **This phone can receive text messages**, or configure a secondary email address to be able to recover your password yourself. If neither of these options are selected, you will need to contact your Study Manager to receive a link to reset your password.
- One of the above options is needed in order to send the authentication code you will need to provide for resetting your password. The phone number or secondary email address provided will be used to send the authentication code even if these are not verified.

- 12. Contact information** - fill in the following fields: your street address, city, state, postal code and country.

## 1.1 Adding a secondary email address

To add a new (secondary) email address to your account:

- 1 Select **Add another email address** link (8) next to the current primary email address.
- 2 Enter the email address in the new field under **Secondary email addresses**.
- 3 Select **Save changes**. A notification email is sent to both the primary email address and to the newly added email address to inform you about the change. At the top of the **Edit your profile** dialog box, you will see a warning message saying that the newly entered email address is not verified (13).

## 1.2 Verifying a secondary email address

To verify a secondary email address:

- 1 Select the **Verify email (7)** link next to the newly added email address. A six-digit code will be sent to your new email address and a **Verify ownership** dialog box is displayed asking you to provide the code in order to verify the new email address.

**Note!** The verification link for the secondary email address is shown only after having saved the changes you may have performed on the other fields on the same page.

- 2 Enter the received code and select **Confirm**. The newly added secondary email address is now verified.

## 1.3 Changing the primary email address

To change the primary address to one of the existing secondary email addresses:

- 1 Select **Set as primary (5)** next to the secondary email address that is to be set as the primary email address.
- 2 Select **Save changes**. A notification email will be sent to both email addresses to inform you about the change. You will use the new primary email address the next time you log in to Viedoc.

**Note!** For a secondary email address to be able to be set as primary, it has to be verified first.

## 1.4 Editing your phone number

To edit your phone number:

- 1 Enter the number in the **Phone number** field in the format `+[CountryCode]PhoneNumber` (for example: +46123456789).
- 2 Select **Save changes**. A notification email will be sent to your primary email address to inform you about the change.

## 1.5 Verifying your phone number

To verify your phone number:

- 1 Make sure that the phone number is correctly entered and that the **Phone can receive text messages** option is selected.
- 2 Select the **Verify phone number** link. A six-digit code will be sent as a text message to your phone and a **Verify ownership** dialog box is displayed. It will ask you to provide the code in order to verify the phone number.
- 3 Enter the code and select **Confirm**. The phone number is now verified.

Security settings

# Security settings

Published by Viedoc System 2024-03-13

## 1. Security settings

### 1 Security settings

Select the settings button (wheel) in the top right corner of the window, and select **Security settings**. A dialog box opens where you can configure the two-factor authentication settings and view your trusted devices:

Security Settings

**Current password** 7  
Please provide your current password to change security settings

.....

**Two-factor authentication** 1

Use two-factor authentication only if any of my studies requires it. 2

Use two-factor authentication always. 3

**Default method to receive the authentication code**

Email - to your primary email address  
Text message - to your registered phone number if your phone can receive text messages

Email  Text message

4 5

**List of trusted devices** 6

Device ID	Valid until	
.....	6/29/2023 8:22:28 AM	Remove

Cancel **Save changes** 8

Here you can configure the following:

**1. Two-factor authentication** - Using two-factor authentication is an extra security measure that would require an extra confirmation step at login, in addition to the user name and the password. For more information, see [Logging in to Viedoc](#).

- a. Choose when you want to use two-factor authentication:
  - Only if any of your studies requires it 2
  - Always 3
- b. Select if you want the authentication code to be sent via:
  - **Email** 4 - the authentication code required at login will be sent to your primary email address, as set in [User settings](#).
  - **Text message** 5 - to the verified phone number set in [User settings](#). Please note that the **Phone can receive text messages** option must be selected in [User settings](#) in order for the authentication code to be able to be sent as a text message.

**6. List of trusted devices** - the list of devices you have marked as trusted at log-in time (for more information see [Logging in to Viedoc](#)). To remove a trusted device from the list, select the delete button next to the respective entry and select **Save changes**. **Note!** These are used for sending the authentication code only to log in to Viedoc and are not used for resetting the password.

**7- 8.** Enter in your password in the **Current password** (7) field and select **Save changes** (8) to apply the changes you made.

2023-11-02 14:49 UTC	94.254.34.43	Chrome 118.0.0 / Windows 10	✓ Successful login

The list is ordered by date and time in descending order.

A successful action, for example a login, is shown with a green check mark in the **Event description** column. A red check mark is shown for an unsuccessful/failed action, and the text next to it explains the result and the reason for the result.

- The message displayed for Viedoc users is: Successful login.
- The message displayed for SSO users is: Successful login using identity provider @username.sso.com

- 2 Select **Complete authentication log** in the top right corner of the displayed authentication log list to generate an Excel file with the complete login history. After generating the authentication log for the first time, you can either regenerate or download the latest previously generated file. The latest file to be generated is datetime stamped according to UTC (Coordinated Universal Time).

The screenshot shows a user interface with a sidebar on the left containing 'User Settings', 'Change Password', 'Security Settings', and 'Authentication Log'. The main area is titled 'Authentication Log' and contains a table with the following data:

Date and time (UTC)	IP address	Agent	Event description
2023-12-11 12:04 UTC	95.193.35.17	Chrome 120.0.0 / Windows 10	✓ Successful login
2023-12-11 10:27 UTC	95.193.35.17	Chrome 120.0.0 / Windows 10	✓ Successful login
2023-12-11 07:46 UTC	95.193.35.17	Chrome 120.0.0 / Windows 10	✓ Successful login
2023-12-11 07:44 UTC	95.193.35.17	Chrome 120.0.0 / Windows 10	✗ Failed login using incorrect password. The account was locked after 3 failed attempts

In the top right corner of the table area, there is a button labeled 'Complete authentication log' with a download icon. Below this button are two links: 'Download (2023-12-11 10:31)' and 'Regenerate'.

The following authentication log messages are displayed for unsuccessful login attempts:

<b>Viedoc users</b>	
<b>Event description in the Authentication Log</b>	<b>User actions</b>
Failed login - password expired.	The user has tried to log in with an expired password.
Failed login - pending Terms of Use and Privacy Policy.	The user has tried to log in but has not accepted the Terms of Use and Privacy Policy.
Failed login - due to locked account.	The user has tried to log in with a locked account.
Failed login - password expired. The account was locked after 3 failed attempts.	User has tried to log in with an expired password and has then entered the wrong password three times on the <b>Change password</b> page.
Failed login - using incorrect password. The account was locked after 3 failed attempts.	The user has tried to log in but has entered the wrong password three times.
Failed login - wrong/missing authentication code. The account was locked after 3 failed attempts.	The user has tried to log in and has entered the wrong two-factor authentication code three times.
Failed login - wrong/missing authentication code.	The user has tried to log in and has entered the wrong/missing two-factor authentication code
<b>SSO (single sign-on users)</b>	
<b>Authentication Log messages</b>	<b>User actions</b>
Failed login - pending Terms of Use and Privacy Policy.	The user has tried to log in but has not accepted the Terms of Use and Privacy Policy.
Failed login - SSO user login attempt using Viedoc identity provider.	The user has tried to log in but has entered the wrong password three times.
Failed login - wrong/missing authentication code. The account was locked after 3 failed attempts.	The user has tried to log in and has entered the wrong two-factor authentication code three times.
<b>Helipad users</b>	
<b>Authentication Log messages</b>	<b>User actions</b>
Failed login due to locked account.	When calling <code>Get token</code> but the user is locked out.
Failed login using old password.	When calling <code>Get token</code> but an old password was provided.
Failed login using old password. The account was locked after 3 failed attempts.	When calling <code>Get token</code> but an old password was used three times in a row.
Failed login using incorrect password.	When calling <code>Get token</code> but an incorrect password was provided.
Failed login - SSO user cannot access API.	When calling <code>Get token</code> for SSO user when using WCF Client ID.
